

NPL Site Narrative for Dover Municipal Well 4

DOVER MUNICIPAL WELL 4 Dover, New Jersey

Conditions at listing (December 1982): The Town of Dover Water Commission owns and operates Municipal Well 4 in Dover Township, Morris County, New Jersey. In August 1980, the well was taken out of service because it was contaminated with halogenated organic solvents from an unknown source.

Status (July 1983): No source has thus far been linked to the contamination. The State is actively investigating possible sources and is reviewing a hydrogeological study submitted by a private party. The Dover Water Commission has been authorized to spend \$45,000 over a 2-year period to identify possible sources and has engaged a consultant to assist in the work.

For more information about the hazardous substances identified in this narrative summary, including general information regarding the effects of exposure to these substances on human health, please see the Agency for Toxic Substances and Disease Registry (ATSDR) ToxFAQs. ATSDR ToxFAQs can be found on the Internet at [ATSDR - ToxFAQs](http://www.atsdr.cdc.gov/toxfaqs/index.asp) (<http://www.atsdr.cdc.gov/toxfaqs/index.asp>) or by telephone at 1-888-42-ATSDR or 1-888-422-8737.
