

# **NPL Site Narrative for Sanitary Landfill Co. (Industrial Waste Disposal Co., Inc.)**

**SANITARY LANDFILL CO. (INDUSTRIAL WASTE DISPOSAL CO.,  
INC.)**  
**Dayton, Ohio**

**Conditions at proposal (October 15, 1984):** The Sanitary Landfill Co., which is owned by Industrial Waste Disposal Co., Inc., operated a 40-acre landfill near Dayton, Montgomery County, Ohio, from 1965 to 1980. The landfill reportedly accepted municipal wastes and various types of industrial wastes, including solvents. The landfill is located above gravel deposits. About 110,000 people draw drinking water from wells within 3 miles of the site. The wells are drilled into a deeper aquifer, which may be connected to the shallow gravel deposits, according to a study conducted by the U.S. Geological Survey. Thus, there is a potential for contamination of public water wells.

**Status (June 10, 1986):** EPA is considering various alternatives for the site.

For more information about the hazardous substances identified in this narrative summary, including general information regarding the effects of exposure to these substances on human health, please see the Agency for Toxic Substances and Disease Registry (ATSDR) ToxFAQs.
